Profesional de la UNVM disertará en Finlandia. By Redacción El Diario del centro del país

Sunday, May 28, 2023 · 08:30

The graduate in Local and Regional Development and researcher at the Center for Research and Transfer (CIT) of the National University of Villa María (UNVM), Dafne Mizdaje, will participate in a conference in Finland with her exhibition "Environmental governance and circular economy: an analysis of territorial proximity".

The experience is part of a postgraduate course through a scholarship funded by the Ministry of Education of Finland and the Team Finland Knowledge (TFK) network together with two universities located in the region of Lapland and Kokkola. The program seeks to generate a space for theoretical exchange of doctoral students who contribute to the field of circular economy from different disciplines.

In addition, it has a practical instance in which they will visit the administrative capital of Lapland, Rovaniemi, which has a strong tourist circuit and various ventures inserted in the framework of the circular economy such as farms, local bakeries and technology companies with social responsibility policies.

"Personally, it is one of the most important steps I am taking, because it is the first time I am having an internationalization experience, where I will socialize the progress states on my research and I will share it in universities of a country that is modeled, since we always take Finland as a reference in the implementation of sustainability policies", said the researcher.
